

MAJI MOTO :: NEWSLETTER :: 21st OCTOBER 2008

After all the surprises we had last times, we thought that it would be great to have a swing at our camp! Nothing relaxes better after the hard working day... Few days of preparation, and here we go: the swing is ready! This is the way we encourage the local community to lead the healthy life full of sport:) But to be true - the swing is occupied very often, and the group of visitors is growing.. We even have had a special training session just for warriors, who at that time smiled as children. But - of course - no photos allowed...

The latrines are ready - we need just some finishing, but apart from that - everything is ready-to-use... It's so nice to observe the result of our own work! Leszek Kotlarski is so proud, and ofcourse we are proud of him:)

Kiwi and Leszek are leaving now to Sega, to start the next project - Police Station in Kogere. We feel sorry that our team is getting thinner and thinner, but.. such is life, and despite the egoistic thoughts we wish them luck and a great time!

The rains have come... On the first day of rain our brave Simbus has already got stuck in the mud on the Maji Moto highway.. Fortunately Sankale's visitors had a 4x4 Defender, and helped us. But Narok seems more and more far away now...

Unfortunately not only Simbus is having the raining season problems - our 21 tons lorry got stuck twice now, which is causing the further delays in material transportation. We run out of time, and all together are getting a bit nervous - our maniatas are leaking heavily, causing us to sleep in the wet beds, and at the back of our camp we have a river flowing... This is definitely a new stage of Maji Moto project:)

Unfortunately the bad season is not over - Leszek Romanowski is having malaria... But don't worry - the three Polish nurses are taking care of him, so he should be back on road soon.
